

**RL942**

Mount Tank, Hopper and Vessel Weighing

**Applications**

- Heavy capacity tanks, blenders, reactors and bulk inventory management
- Petroleum refining process control
- Chemical blending/batching

**Mount Only. Does Not Include Load Cell**

The RL942 mount assembly utilizes the RL94 load cell to provide an unmatched level of performance in tank and hopper weighing applications. The RL94 series mount is ideally suited for indoor and outdoor process control operations with medium to heavy capacities. The low-profile compression load cell features a fixed mounting system. Built-in protection against lateral forces is standard. Modules are available with nickel-plated or stainless steel construction.
